

Global environmental policy statement

As an international law firm, we recognise our responsibility to protect the environment and mitigate any impact our activities may have both locally and internationally. This includes the impact of our working practices; the purchasing and consumption of energy and resources, the creation and disposal of our waste, and the use of transportation. Our policy covers all environmental aspects over which we have influence or are able to directly control

Our Impacts

We have identified our most significant environmental impacts as:

- greenhouse gas emissions resulting from energy used within our business premises and in connection with our travel;
- resource use, such as paper, water, food, and other goods and services; and
- waste generation and disposal.

Our Commitment

Where practicable, we will:

- monitor and reduce our energy consumption, including energy derived from fossil fuels, and promote efficient energy use within our business premises;
- monitor and reduce our travel where possible, encouraging more sustainable alternatives;
- seek to reduce our use of resources such as paper and water;
- reduce our overall waste, minimise the amount of waste sent to landfill, and maximise our reuse and recycling rates;
- use, store and dispose of hazardous waste in line with best environmental practices;

- seek to source sustainable products, assessing the environmental impact of our supply chain and work towards encouraging key suppliers to evaluate and improve their environmental practices;
- share this policy with all employees and promote environmental awareness and responsibility; and;
- report on our environmental performance regularly both internally and externally and comply with all applicable regulations and legislative requirements.

Scope

This policy applies to Clyde & Co LLP's global business activities.

We will review this policy annually and ensure that the associated commitments are monitored so that they remain relevant.

Signed

Peter Hirst, Senior Partner
